RFOED-RF: own-node-miss
(98.7% of errors)
test document, true class c_j
correctly passes earlier nodes $c_1, \ldots, c_{j-1}$
reaches its own node c_j
node c_j does not fire
(under-confident: test score $< \tau$)
RFOED-NN: early-capture
(95.4% of errors)
test document, true class c_j
an earlier node c_i $(i < j)$
fires a false positive
(over-confident: neg. score $> \tau$)
the document is removed from contention
its own node c_j is never reached
